FOREWORD

We are certain that everyone of us with an inherent love for numismatics can readily appreciate the thrill and satisfaction of having a collection of such importance as is here represented.

This sale represents the coins and collections of a number of consignors from this country as well as Europe. As in the years gone by each of our Waldorf sales develops a new surge of interest in fine coins as well as rarities. We hope that when you read the following pages you will get some measure of the enjoyment we had in cataloguing this collection. We cannot possibly give here in the Foreword a detailed description of this great collection, but we have endeavored to present a catalogue that you will want to add to your reference library, because of the wealth of information only available in sales of this calibre.

All illustrations are of the actual coins, but the photographs do not do the coin justice. An Uncirculated or Proof coin has a beauty that a photograph cannot always capture.

Aside from the great rarities in this sale there are many medium priced coins. The buyer of these coins can be assured of the same careful and appreciative service as the buyer of the complete set of $3 gold.

Our enthusiasm in the description of the coins is truly warranted. Every coin has been properly attributed and classified most carefully.

In our past auction sales we have offered some of the finest and most valuable numismatic collections, but no sale has featured a more outstanding selection of great rarities than this one. This is truly a "Quality Sale".

Try to attend this "Sale of the Year" in person. If unable to attend we will act as your agent at no additional charge to you. In bidding keep in mind the high quality of the material offered.

FOREIGN SILVER COINS

THE FIRST DOLLARS of the World

BRABANT

Maria of Burgundy

1477

THE REAL FIRST DOLLAR OF THE WORLD

1 This is the predecessor of all the Thalers which follow 25 years later from Joachimstal. Maybe we could call it the pattern crown of the world (see information). Only a few, less than 6 pieces known, the first record in Van Mieris Dutch 3 monumental volumes "Histori Der Nederlandsche Vorsten" (History of the Dutch princes from Count Albert to Charles V), published in The Hague 1732–35, on page 140, Vol. I. Our specimen may be the Van Mieris coin, having come down through collectors for 3 centuries.

Obv: Maria Magdalena as representing Maria of Burgundy with Christ child on arm, to the right St. Andreas protecting the golden fleece and St. Sebastian with arrow and bow with which he originally was killed. This is all to represent the love of the archduke for his Duchess. Inscr. reads TOTA PULCHRA ES AMICA MEA, ET MACULA NON EST IN (you are real beautiful, my love, and you are unmarred).

Rev: Crowned shield in golden fleece. Date 14–77 in Gothic lettering above.

Valued $20,000

General History of the Guldiner 1477

The idea of minting large silver coins was, not unnaturally, born around the 15th centurally, because of the emergence of large silver mines, and the plan was to mint a silver coin equal in value to the usual gold coin of the times, the gold gulden which dominated trade and had originated in the florin of Florence, Italy, of 1252, followed by that of Venice in 1272, with a weight of 3.537 grams.

The first prince to get this idea was Maximilian, son of Emperor Friedrich III of the Holy Roman Empire. In 1477 he married

Story of the Guldiner 1477

For the story of how it came to be minted, we refer to Mr. Brekke's article in the November issue of "World Coins". See the left column.

This coin has been sold at auction 2 times in this century:

May 1911: Adolph Hess Nachfolger, Frankfort. In this auction of duplicates of the Hermitage, Leningrad, one was sold. Berliner Staatsmuseum bought the Guldiner 1477 for DM 1,800.–, and has kept the coin since. This Museum is now in East Berlin. 1,800 Goldmarks in 1911 was over a 1000 gold dollars. This price

History of the Guldiner 1477 (continued)

Maria, daughter of Duke Charles the Bold of Burgundy, who fell in battle at Nancy on January 5 of the same year. Charles' lands were divided between France and the Empire.

Duke Charles had had a confidential secretary, the Italian Giovanni Candida, who after Charles' death was employed by Maximilian in the same capacity. This Candida was very interested in coinage and in medals and is known to have made an undated marriage medal in 1477 and many other medals.

It is possible, even probable, that this same influential confidant suggested to Maximilian that he should be the first to issue a large silver coin equal in value to the current gold coin, the Andreas gulden, which was the only gold coin minted by Burgundy similar in weight to the florin, the Venetian gold ducat and the French ecu d'or initiated by French King Philip (1284-1340).

Thus in 1477 Maximilian issued the first "thaler," weighing 34.46 grams, in value the exact counterpart of the current gold coins. The number minted was probably low, but the few specimens which have survived show clearly that these coins have been in circulation. One reposes in the Berlin Museum and weighs 32.485 grams; the other specimen was for many years in the private collection of the well-known German coin dealer and numismatic writer Richard Gaettens, and is now in the crown collection of the consignor.

This coin was quite clearly issued for circulation and is indisputably the FIRST DOLLAR-SIZED COIN OF THE WORLD. Place of issue was Brabant in the Netherlands.

Achduke Sigismund of Tirol, a cousin of Maximilian, would quite naturally be the first to notice this revolutionary development, as his lands embraced the largest silver mines in Europe, in Schwaz. Most of the silver from the Tirol mines ever since 1275 was minted in Meran, south of the Brenner pass, but in 1477 it was decided to move the mint to Hall, north of the Brenner. There it was nearer the mines and the capital at Innsbruck, and the assistant mintmaster in Meran, Hermann Grunhofer, was made mintmaster in Hall.

Sigismund's financial adviser, was, like Maximilian's Candida, also an Italian from Venice, named Antonio de Caballis, and this man was the "father" of Sigismund's coin policies. It is not unnatural to assume that

Story of the Guldiner 1477 (continued)

the value today exactly $15,000!

May 1931: Hess, Frankfurt. Here Mr. Brekke's specimen appears for the first time since it was mentioned in V. Mieris "Histori of the Nederlandsche Vorsten" as belonging to a Dutch collector, but unknown in Madai and other well known Thaler-Cabinets, like Schulthess, Reimmann. It sold for DM 550, due to the world depression and especially to the situation in Germany after the inflationary years.

In 1941 Frankfurter Munzhandlung, E. Button, Frankfurt, sold the same coin at one of his auctions, and it was bought by Richard Gaettens.

Richard Gaettens died in 1964 and Mr. Brekke bought the coin from his son, now a coin dealer in Lubeck, Germany.

In 1914 Albert E. Frey wrote his book "Dated European Coinage Prior to 1501" in which he definitely describes this coin as the "oldest Thaler in the world". The same description of this coin was used at the Hess auctions of 1911 and 1931.

Mr. Gruenthal of the A.N.S. was very well aware of the importance of this coin when it was shown to him by Mr. Brekke in October 1965. He produced the auction catalogue of Hess 1931 and was very interested to see that this specimen was the exact coin sold in 1931. Gaettens bought it in 1941 from the man who acquired it in 1931, so there can be no doubt that this specimen is the third known coin in private hands beside the Leningrad and East Berlin specimens.

Jacques Schulman, who keeps a very up to date file on all important coins, also confirmed that he knew of no 4th specimen, although the cataloguer presumes there is a 4th specimen in Vienna, according to Mr. Werkner of Innsbruck.

We think one can quite safely say that this specimen is unique in private hands. Further, we think it is not right to use the word "Schau-Thaler" which is more like a medal and then it is not a "Thaler" other than in weight and size, because this word only came into existence after the Joachimstal series came to be. The correct word for this Thaler is "Guldiner." Further, as it was minted to have the exact value of the then reigning Andreasgulden (in gold), it was obviously meant to be used as money. There is nothing that suggests that it was ever meant as a medal. Candida, secretary to Maximilian, who is the father of the issue, minted several wellknown medals in 1477, but they are so completely different in relief, rim and general looks, that there is no doubt that the Guldiner 1477 is a coin, the forerunner of the Thaler, Dollar and Crown Series of the world. The issue was surely small, both because it was the first time, but also because the trade did not like these

History of the Guldiner 1477 (continued)

the minting of the Brabanter thaler, called a guldiner or gulden-groschen, animated the Tirolers to do the same, especially as they had access to infinitely more silver than Maximilian, and in 1481 they minted the first Falt thalers and in 1486 the first Tiroler thalers weighing from 29.17 to 32.02 grams.

Strangely enough, the trade did not like these large silver pieces very much, so the issue was also not large in Hall, and it was not before the Counts of Schlick started their large issues in Joachimsthal in 1518 that the basic silver crown of the world was generally accepted and spread to all parts of Europe and the world.

Story of the Guldiner 1477 (continued)

large silver pieces. This probably explains why Maximilian did not continue the series. Even the Tiroler Guldengroschen or Guldiner of 1486 which is offered in this sale, lot #2 was definitely not popular when it appeared. And although called "taler", the word "taler" did not yet exist at that time either. It was really the Joachimstaler that made the breakthrough and taler became popular from then on and the word "taler" came about.

The Guldiner 1477 might be called the "Pattern Crown of the World" because it became a pattern for a future crown. Only one crown collector in the world can obtain this "Crowning" piece for his collection.

SECOND SESSION

FRIDAY EVENING, MAY 20, 1966

AT 7:00 P. M.

Lots 751–1513

A SELECT GROUP OF U.S. TYPE COINS

HALF CENTS

751 1793 A very choice coin. Obverse is sharply struck and though the planchet is slightly porous in spots it is an Extremely Fine specimen. The reverse is Very Fine with several corroded spots through parts of UNITED STATES; remainder of detail and legends all distinct. A well centered specimen and valued at (1500.00) (PHOTO)

752 1832 Light reddish brown toning. Sharp Very Fine. Worth (20.00)

LARGE CENTS

AN OUTSTANDING 1793 CHAIN CENT

753 1793 S-3 CHAIN AMERICA – Large leaning R in Liberty. Practically Mint State 65. This variety shows the incustation of the Chain upon the obverse plus a planchet flaw at rim. A beautiful specimen with faint traces of original red around the Chain and some of the letters on reverse. It has been many years since we have seen a Chain Cent in this condition and any estimate of its value would be sheer guesswork. On a comparative basis we feel this specimen is much rarer than the equally rare 1796 silver coinage, and is just as much in demand. As a guide we suggest $7500.00 as a fair price to pay for this great rarity (PHOTO)

CHOICE 1793 WREATH CENT

754 1793 S-9 Wreath. Edge has Vine and Bars. Choice About Uncirculated. A beautiful MS 60 specimen. Two die cracks on right reverse through R and CA in America. Very pale reddish brown surface. Type specimens of this calibre are virtually non-existant. The usual flat struck weakness in curls. The Helfenstein specimen with perfect die reverse realized $2900.00 and this coin we feel should realize a similar bid (PHOTO)

UNITED STATES TERRITORIAL GOLD

TEMPLETON REID — ASSAYER OF GOLD

LUMPKIN COUNTY, GEORGIA – 1830

$10 1830 UNDATED

1514 Templeton Reid was the first person to issue private gold coins in the United States, and his few coins rank amongst the rarest of all private issues. Mr. Reid operated a private mint near the gold mines of Lumpkin County, Georgia. He struck coins in denominations of $2.50, $5.00 and $10.00 and because his coins were of a higher grade of gold than any other gold coins ever issued in this country, virtually all the coins he struck were melted down and the few pieces remaining in the hands of the collecting fraternity are the greatest prize and most sought after of all Territorial Gold coins . . . and now for the rarest gem and the classic specimen of the three known specimens of the $10 (1830) TEN DOLLARS in center in two rows, TEMPLETON REID above, ASSAYER below. Reverse, GEORGIA GOLD in two lines in center surrounded by a majestic border of 40 stars. This coin, as far as all our research has been able to uncover, has never been offered at any sale and is the specimen from the famous Ball collection of Muncie, Indiana. It has been in this family's collection many years and it is possible the pedigree can be traced back still further. This is the SPECIMEN illustrated these many years in the Whitman "Guide Book". A Gem Prooflike coin with minor hairlines. There is one specimen in the collection in the Smithsonian Institute in Washington, and one other specimen is in the cabinet of a famous private collection . . . and now the Rarest of the Rare . . . one of the highlights of this important auction is offered to the highest bidder. (PHOTO)

NORTH CAROLINA GOLD

CHRISTOPHER BECHTLER

1515 **$1.00 N. CAROLINA 30 G.** Obverse **30 G,** star below, **C. BECHTLER.** RUTHERF. around. Reverse **ONE** in field, **N:CAROLINA GOLD. DOLLAR,** around. Extremely Fine. Worth (275.00)

1516 **$5.00 C. Bechtler, Assayer. In inner circle Rutherford County. Rev. North Carolina Gold. Large Numeral 5, in semi-circle, "dollars", 20 carats, and 150 G. beneath. Fine reeded edge. Practically Gem Uncirculated. The Newcomer specimen in 1944 sold for $1000.00. We doubt if there are 6 of these coins in existence and to estimate a price is almost pure guesswork, but as a guide we estimate the current value to be in excess of $3000.00. The above was the description of this specimen in our January, 1963 auction. It realized $1,800.00 then. Three years later, this rarity should realize somewhat more. (PHOTO)**

AUGUST BECHTLER

CAROLINA GOLD

1842–1852

August Bechtler, the son of Christopher Bechtler, was among the first to issue private gold coins in this country. It is interesting to note that the inscriptions "Carolina", "Georgia", and "North Carolina" on their coins designated the fineness of the gold content. "Carolina" gold coins were 21 carats, not the lowest, nor the highest grade which bore the stamp of "Georgia" and was 22 carats fine . . . while "North Carolina" was low and was of 20 carats.

1517 **$5 134 G. 21 carats. Obverse 5 in center, DOLLARS in semi-circle below. A. BECHTLER in large letters above RUTHERFORD below in small letters. Reverse, 134 G in center 21 CARATS below, CAROLINA GOLD around. Considerable mint lustre. Faint edge bump noticeable on obverse at 7 o'clock. Choice Extremely Fine. Worth (600.00) (PHOTO)**

1518 **$5 128 G. 22 carats. Choice Extremely Fine. Considerable lustre (600.00) (PHOTO)**

NORRIS, GRIEG & NORRIS

SAN FRANCISCO – 1849

The first specimens of private gold coinage were minted by this famous firm. They only issued one denimination . . . the $5.00 . . . both plain edge and reeded edge and one unique specimen dated 1850 is known with STOCKTON beneath date.

1519 **$5 1849 Plain edge. Small eagle with numeral 5 on breast in small shield. This numeral very dim. Around, CALIFORNIA GOLD WITHOUT ALLOY. Reverse, 1849 in center; NG & N SAN FRANCISCO within circle of stars. Around, in larger letters FULL WEIGHT OF HALF EAGLE. Lustrous About Uncirculated (1000.00) (PHOTO)**

MOFFAT & CO.

SAN FRANCISCO 1849–1853

The assaying firm of Moffat & Co. were in business in California from 1849 thru 1853 and were appointed United States Assay contractors in 1850, with Augustus Humbert as United States Assayer. This company was famous for the ingots or bars as well as the gold coins.

1520 **$20 1853 Liberty head facing left, date below, thirteen stars around, and MOFFAT & CO. on diadem. The reverse is similar to the regular double eagle except for legend SAN FRANCISCO, CALIFORNIA. Very minor handling nicks in field and on face of Liberty. Choice About Uncirculated and should sell for over (850.00) (PHOTO)**

COINAGE OF AUGUSTUS HUMBERT

UNITED STATES ASSAYER, SAN FRANCISCO

1851–1852

Augustus Humbert contracted with Moffat & Co. to strike ingots and slugs . . . as the $50.00 gold pieces were called. The striking of these coins were all under authorization of Congress and in effect this was official U. S. coinage rather than private coinage such as Norris, Grieg, Norris and others turned out.

1521 **$50 1851 Lettered edge. Eagle with shield and ribbon on which is inscribed LIBERTY ,scroll above incused 880 THOUS, 50 D. C. (below) around UNITED STATES OF AMERICA. Lettered edge AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA 1851. Reverse, 50 in center of small target, fine engine turned design. This is a Very Fine specimen with the usual tiny nicks and age scars. Only one corner shows bruise. Estimated to realize over (3000.00) (PHOTO)**

1522 **$50 1851 Lettered edge. Similar to above coin but variety without 50 incused in center of small target on reverse. The surface of this specimen is considerably less marked and nicked than the preceding coin. The reverse however shows more handling and wear. Very desirable and rare. Worth over (3000.00) (PHOTO)**

1523 **1851 $50 OCTAGONAL. 887 THOUS. VARIETY. AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA around outer edge, UNITED STATES OF AMERICA FIFTY DOLLARS within circle containing eagle holding ribbon. Reverse, engine turned design with WIDE SPACE between inner design and braided ropelike design EXTENDING TO OUTER EDGE, the regular reverse of 1851. A MAGNIFICENT SPECIMEN WITH PROOF SURFACE! Accompanying this lot was a note stating, "Probably a Presentation Piece" made for Augustus Humbert. A pair were sold in February, 1961 at a New York auction; (both different varieties than this) both were $10,000.00 each (PHOTO)**

1524 1851 $50 OCTAGONAL 887 THOUS. VARIETY as above EXCEPT THE REVERSE IS THAT OF 1852. The 1852 reverse has a NARROW SPACE between the inner design and braided ropelike design NEAR OUTER EDGE but DOES NOT EXTEND TO OUTER EDGE. This MAJOR VARIETY was first discovered in 1956 by James Kelly and so noted in his 1956 convention sale at Chicago. Since then, we understand two or three additional specimens have been discovered, even though student and specialists of California gold have examined a great many specimens during the intervening decade. This coin has a very fine UNITED STATES OF AMERICA 1851 and eagle, AUGUSTUS HUMBERT UNITED is only partly legible (due more to the usual weakness of striking rather than wear), STATES ASSAYER OF GOLD CALIFORNIA fairly sharp. Reverse, Very Fine. Some of the small nicks that generally appear on these soft gold coins have been "smoothed out" on the obverse, the reverse still contains the usual quota. The owner says he paid $4,500.00 for this VERY RARE coin several years ago. He feels it should now be worth (6,000.00) (PHOTO)

1525 $20 1852 over '51. Eagle with shield and ribbon on which is inscribed LIBERTY 884 THOUS on scroll above; around, UNITED STATES OF AMERICA TWENTY DOLS. Reverse, Oblong square in center of engine turned design. Inscribed in center of four lines AUGUSTUS HUMBERT/UNITED STATES ASSAYER/OF GOLD CALIFORNIA/1852. The date 1852 is recut over '51. This is one of the finest known of this rarity with considerable mint lustre and hardly any signs of wear or misuse. Virtually Uncirculated. Worth over (3500.00) (PHOTO)

1526 1851 SILVER, bought from a leading dealer in 1961 who described it as follows: "RECTANGULAR SILVER INGOT" bearing SIMILAR INSCRIPTION IN TABLET FORM AS APPEARS ON THE REVERSE OF THE $10 HUMBERT except DATE IS 1851 INSTEAD OF 1852. EVIDENTLY STRUCK FROM THE ORIGINAL DIE IN 1851 BEFORE IT WAS CHANGED EARLY IN 1852. THE ONLY SUCH PIECE WE HAVE SEEN! The consignor now values it at (3,000.00) (PHOTO)

UNITED STATES ASSAY OFFICE

SAN FRANCISCO 1852–1853

This firm was organized in 1852 after the dissolution of Moffat & Co. The $50 gold pieces are very rare as they were worth more than their face value and were remelted.

1527 $50 1852 887 Thous. Eagle with shield and ribbon inscribed LIBERTY. 887 THOUS. on scroll above; around UNITED STATES OF AMERICA FIFTY DOLLS all within a beaded circle, around which in smaller letters UNITED STATES ASSAY OFFICE OF GOLD SAN FRANCISCO CALIFORNIA 1852. Reverse, Target in center of engine-turned design. Choice Extremely Fine with the usual minor nicks which is customary on these large coins. This specimen valued at (3500.00)

MINERS BANK

SAN FRANCISCO - 1849

1528 $10 (1849) The only denomination minted by this firm and very few in existence. TEN D. in center, star on each flank, MINERS BANK above. SAN FRANCISCO below .Reverse, Eagle with semi-circle of 13 stars beneath and CALIFORNIA above. This is a splendid About Uncirculated specimen free of any faults, showing only wear on high points of coin. Should realize over (3000.00) (PHOTO)

PACIFIC COMPANY

1529 1849 PACIFIC COMPANY CALIFORNIA around eagle; Reverse, 5 DOLLARS below radiant liberty cap interspersed with stars, practically Uncirculated, reeded edge. Struck double-thick on planchet said to be of low grade gold and then gold plated. Owner says he paid $14,500.00. Only three regular gold specimens are known (in Mint collection; the C. Williams piece and the Brand piece which we sold in our March, 1964 auction and which was finally knocked down after spirited bidding at $18,000.00. We hesitate to venture an opinion what this rarity will now bring. (PHOTO)

SAN FRANCISCO

1530 1851 2½ DOLLARS, wreath SAN FRANCISCO STATE OF CALIFORNIA. Obverse, Liberty head with LIBERTY on band, 13 stars, brilliant, Prooflike. Adams assigns it no. 79 and states it was struck in silver. This one is gold plated. A large Eastern firm advertised a silver specimen some time ago at $475.00 and stated ONLY 7 OR 8 PIECES KNOWN TO EXIST. A lovely specimen worth (750.00) (PHOTO)

SCHULTZ & CO.

1531 1851 Liberty Head facing left, 13 stars, SCHULTS & CO. (engraver mispelled with S instead of Z, on diadem. Reverse, PURE CALIFORNIA GOLD FIVE D. Appears to be Uncirculated but has minute edge nick. This specimen has a matte type finish similar to the mint applied sandblast surface of the gold coin issues of 1908–1915. Two specimens of this great rarity have been sold in recent years and brought high prices . . .the Walton specimen, described as "Exceedingly rare, one of the rarest of all Pioneer gold coins" and the specimen sold to a dealer from our 1964 sale. To the best of our knowledge, there are less than 6 specimens known and this, possibly the finest known should be worth over (10.000.00) (PHOTO)

WASS, MOLITOR & CO.

SAN FRANCISCO - 1852–1855

Wass Molitor & Co. was formed by Count S. C. Wass and A. P. Molitor. The dies for all their coins were engraved by Albert Kuner. All denominations of their gold coins are rare.

1532 **$10 1852 Large head variety. Large Liberty Head left, W. M. & Co. on diadem, date below. Square base on 2. Thirteen stars around. Reverse, Eagle of adopted design in center. S. M. V. (Standard Mint Value) CALIFORNIA GOLD TEN D. around. Considerable mint lustre. Never too sharply struck because of concave striking. Tiny rim cut on obverse at 11 o'clock. Choice Very Fine and worth (650.00) (PHOTO)**

1533 **1855 $20 Small head left, with WASS MOLITOR & CO. on diadem, 13 stars around; date below bust. Reverse, eagle center. Legend SAN FRANCISCO CALIFORNIA TWENTY DOL. Extremely Fine with some luster. VERY RARE. The Guide Book does not price it in better than Very Fine condition due to its rarity. Worth (2,500.00) (PHOTO)**

1534 **$50 1855 Round. Small Liberty head left, date below, 13 large stars around. Reverse 50 DOLLARS in center in two lines in wreath with 900 THOUS in small scroll above wreath. Around SAN FRANCISCO CALIFORNIA WASS MOLITOR & CO. To enhance the appearance of this spectacular coin all nicks were removed from field obverse and reverse. This retooling does not detract from value of coin which is the only type of round Fifty Dollar gold coin available to collectors. The few known Kellogg $50's are priced at over $20,000 each . . . and this lovely Extremely Fine Wass Molitor round $50 should realize the catalogue value of (4500.00) (PHOTO)**

KELLOGG & CO.

SAN FRANCISCO - 1854–1855

THE POPULAR 1879 $4.00 GOLD

1716 **$4.00 1879. The Flowing Hair variety of which 415 were struck and though this popular coin appears frequently in auctions it is only because most important collections have this type. Barber designed this lovely coin which was intended to meet with universal appeal to compete with the foreign gold equivalent of the time, i. e. the French 20 Franc, the Italian 20 Lire, etc. One of the most sought after of all U. S. gold coins and certainly the most attractive. Worth close to the catalogue listing of (6000.00) (PHOTO)**

PAPER MONEY OF THE UNITED STATES

LARGE SIZE NOTES

What this consignment lacks in quantity is more than made up by the fact that it offers three excessively rare notes, including one unknown specimen. It is a thrill for the cataloguer to offer these rarities missing from most great collections of U. S. Currency.

THE EXCESSIVELY RARE $50 LEGAL TENDER

SERIES OF 1863

1844 **$50 Fr. 150 1863. Chittenden and Spinner. Second obligation, Red seal. This is a great rarity and especially since this note is crisp About Uncirculated we estimate it should realize a record bid of over (2000.00) (PHOTO)**

INTEREST BEARING NOTES

THREE YEAR NOTES

The notes of this issue bore interest at 7 3/10% for a period of three years. These are considered the rarest of all issues of United States currency. The late Robert Friedberg wrote, and we quote: "When one considers the perilous state of the nation in those years (1863–64–65), the scarcity of money and the general fear, it was a rare person indeed, one either supremely confident or sublimely ignorant, who did not turn in his interest bearing money the moment the interest became payable. This is why so few of these exist today and why so many of the higher values are completely unknown." These Interest Bearing issues were authorized by Congress because of the many financial emergencies during the Civil War years. The interest of 7 3/10% is the highest ever paid by the Government on its notes. When issued these notes had five coupons attached. each coupon bearing the interest for a six month period. At the end of a six month period one coupon could be detached and the interest on it collected, as with the interest coupons on bonds. When the final payment was made the note itself was presented and net result to the collectors of these notes is borne out by Mr. Friedberg in his book "Paper Money of the United States" (see notes 196–212). Most notes are unknown.

1847 **$50 Fr. 212–a. Note issued under the Act of March 3, 1865. The note illustrated on page 60, Fifth Edition "Paper Money of the United States", shows all the coupons and as such is unique. The note we offer now has had all coupons detached. Signed Colby and Spinner. Reverse is Friedberg Design 57. A rubber stamped notation is on reverse left portion of note... PAY SECRETARY... (rest of message not clear). Age stain on obverse in area below STATES and red seal. Three small tear holes in left segment of note and numerous pin holes visible when note is held to the light. Few ink stains obverse and reverse. General appearance of this note is choice Very Fine with minor faults. No price has ever been noted in the catalogue on this great rarity and we can only suggest a bid of over (3500.00) (PHOTO)**

AN UNKNOWN CLASSIC

THE $500 INTEREST BEARING NOTE

1848 **$500 Fr. 212-c. Unknown until the consignor received it as part of an inheritance last year. It was an electrifying experience to be shown this note and it is a greater thrill being able to auction the greatest find in the entire history of U. S. paper money. Vignette of Hamilton top center, and half length figure of Washington in lower right. Mortar cannon lower left. Small red seal. Signed Colby and Spinner. One coupon still attached. The note has a few edge tears and has been punch cancelled. To reinforce an obvious tear in note through Spinner's signature up through Washington's portrait and almost to top right segment of note, a flap from an envelope is attached on back of note. Beneath printed number 7811 is written 78116. In margin on top reverse it is hand-written in pen: "573B WRITING HAS EVIDENTLY BEEN REMOVED FROM THE PAYOR BLANK OF THIS NOTE" Initialed "SMC" and dated "JUN 26, (18)68". This note is sprinkled with the famous pin or staple holes, has been creased and folded several times. The remaining coupon also shows four round punch cancellations. There is no way the cataloguer can ascertain a figure as a guide unless we use the scale of comparative values . . . is as rare as a "Stella" selling for approximately $6000 . . . or is it as rare as an 1838-O Half Dollar worth $9000. In the field of currency we consider it the rarest note to be offered in the past 75 years and we would suggest a bid of over (5000.00) (PHOTO)**

Elizabeth was born 1709 as daughter of Peter the Great and Catherine I. She gained the throne by overthrowing the young Czar Ivan VI and the regency of his mother, Anna Leopoldovna. Her coup d'etat was made possible by her popularity with the imperial guards who hated the German favorites of Anna and who revered in Elizabeth the memory of her father. Elizabeth herself, arms in hand, led the bloodless coup. She took part in the Seven Years War against Frederick the Great. Shortly after her accession, Elizabeth decreed the destruction of coins with Ivan's name.
